

Dear Customer,

With this INFINEON Technologies Information Note we would like to inform you about the following

Minor updates of product information descriptions affecting Infineon's 3D magnetic sensors

N° 042/19

Minor updates of product information descriptions affecting Infineon's 3D magnetic sensors

► **Products affected:** Please refer to attached affected product list 1_cip04219

► **Detailed Change Information:**

Subject: Wording of power-up sequence descriptions in datasheets will be modified. Therefore, datasheet revision numbering will change as well. Moisture sensitivity level (MSL1) will be correctly printed on the labels for the tape & reel box.

Reason: For a better understanding of the parameter, wording of the power-up sequence description needs to be updated. MSL1 (in °C) on the box labels must be corrected in order to be in agreement with the correct parameter value in the datasheet.
